👔 PROFESSIONAL EXPERIENCE

2012 2014

IT SUPPORT ANALYST | PLANTEC ASSIST LIMITED
45-51 Shakespeare Street, Southport, PR8 5AB | www.plantecassist.com

At Plantec Assist I am responsible for all general IT support queries. Maintaining and making changes to all of the servers, including Windows Server 2008 R2, MSSQL, MYSQL, Active Directory, Windows Deplayment Service, a Cisco IronPort and a Mitel-5000 Telephone system, which included programming an Interactive Voice Recording in order to get clients to the correct department and avoid misdirected calls.

2014 2015

WEB AND APP DEVELOPER | KINDERTONS ACCIDENT MANAGEMENT
45-51 Shakespeare Street, Southport, PR8 5AB | www.kindertons.co.uk

Kindertons bought Plantec Assist Limited, and I transfered over to work for them under a different role as a Web and junior App developer. My primary job is making promo videos and rolling out bug fixes to the Android and iPhone apps. My role also includes building Login portals and JSON API's to connect our databases and mobile applications.

🎓 EDUCATION

2010 2012

COLLEGE A-LEVELS/B-TECH | SOUTHPORT COLLEGE
Mornington Rd, Southport, Merseyside PR9 0TT | www.southport-college.ac.uk

During my IT course at college we studied various subjects covering the basics for all areas, including some of the following: PC Troubleshooting and Repair, Organisational Systems Security, Computer Systems, Netoworked Systems Security, and Communication Technologies. With Communication and Employability as an extra subject.
I achived the equivalent to three A*'s, getting three High Distinctions in total, the highest grade possible.

2005 2010

GCSE'S | THE ACADEMY OF ST FRANCIS OF ASSISI
Gardners Drive L6 7UR | http://www.asfaonline.org

When I was at school I got 3 C's: Mathematics, English Language, Film Studies.
One at B grade: Religous Studies, one at D grade: Media Studies.
I also got 6 Level 2 OCR grade C's: two for Business Studies and four for Science.
Finally I got 2 Level 2 OCR B grades in ICT.

⬢ MY SKILLS

I have over 12 months experience as a web developer using the Laravel framework.
Most of the recent project's I've worked on have been for internal purposes, such as our Intranet and the HR database.

I currently work as part of a team re-developing the companies Microsoft Access database in order to bring it forward into the future.
I am regularly using frameworks such as Twitter Bootstrap and JQuery alongside Laravel to build web applications from scratch.

Our internal database application connects to the existing MSSQL server and a newer MySQL server simultaneously to create a seamless transition from one SQL server to another within a modern web-based user interface.
This setup allows us to take advantage of multiple functions across the two servers and make the most of Laravel's 'Fluent' sql queries.
As part of the requirements for our internal databases, i have also helped integrate Microsoft Active-Directory (LDAP) security into our Laravel applications to interact with our current setup.

As some of these projects are team collaborations, I have been using Git and Bitbucket for version control and to help manage team member code submissions (via SourceTree).

I am well versed in all major operating systems, including Windows 7 and 8/8.1, Mac OSX 10.7.x - 10.9.x and many Linux distributions. I have used all of the operating systems mentioned in both desktop and server applications, I also have a good amount of experience with Digital Ocean (both CentOS and Ubuntu 14.04LTS), SSH and Laravel Forge.
